Dear Dr. Anang Sutono:

We have reached a decision regarding your submission to Jurnal Bisnis dan Manajemen, "THE INFLUENCE OF DESTINATION ATTRIBUTES ON TOURISTS' LENGTH OF STAY IN KEBUMEN REGENCY, CENTRAL JAVA".

Our decision is: Resubmit

Make sure you put an abstract in Bahasa Indonesia and shows the research uniqueness (gap) in introduction section, as compared to the previous literature works.

jbm@fe.unpad.ac.id
Dear Dr. Anang Sutono:

You manuscript lacks of the research gap statement in the introduction section. We found the research gap is not properly expressed. There should be more synthesis from previous study to express it. Furthermore, the title must also be changed. Our editorial board members see that the title of your manuscript is too common (do not use the word influence).

Our decision is: Revisions Required

Thank you.

Dear Editor Jurnal Bisnis dan Manajemen,

It is truly a great honour for me to receive your e-mail and I am very glad to convey the revised manuscript as your advice. The following attachment is related to the new title of the manuscript "MEASURING THE CONNECTEDNESS OF DESTINATION ATTRIBUTES AND TOURISTS' LENGTH OF STAY IN KEBUMEN REGENCY" and these are the research gap that I found in the previous articles.

Research GAP

Previous Research	Title	Finding	Relevancy
Carlos Estrella Barros & Luis Pinto Machado (2016)	The Length of Stay in Tourism (Case Study Germany Tourists in Madeira Island)	Length of Stay in the scope tourism is positively influenced by several factors such as demographics, previous visits, as well as destination quality and attributes	Positive
Benedicto Kazzorens (2014)	Determinants of Tourist Length of Stay in Tanzania	To promote tourism revenue based on the tourists' length of stay the stakeholders need to diversify tourism activities to encourage business visitors and those on leisure and recreation to stay longer	Positive
I Gede Yoga Sasmita & I Nyoman Mahardena Yana (2017)	The Influence of Number of Tourist Visit, Long Stay Tourism and Hotel Residence Against Original Regional Income and Welfare Communities in District / City in Bali Province	The number of tourist visits and hotel occupancy rates has a positive effect and significant to local revenue, while the length of stay of tourists negative and insignificant effect on local revenue.	Negative
Puji Wibowo, N. B. (2012)	Effect of Tourism Motivation, Perception of Power Attract and Quality of Service to The Len' of Tourist in DIY Province	There is no significant effect between perceptions about destination attractiveness to the length of stay of tourists (LOS)	Negative

I was wondering if you could again suggest me to make the manuscript better. Thank you very much indeed for your attention.

Dear Dr. Anang,

We hope you are doing well.

Attached is the edited manuscript that you authored for publication of the March 2021 edition at JBM. Please check the paper and email us the revised version as there are still some issues; **some citations in the body article are not matched with the reference list**. Please do not add additional pages.

The publication fee of d IDR 1.500.000 can be transferred to the following Bank account: 0010020175051 (BJB Cab. Utama) LMFE UNPAD. Please email the receipt to jbm@fe.unpad.ac.id. We are waiting for your paper within this week.

Thank you,

Egi Arvian Firmansyah

THE INFLUENCE OF DESTINATION ATTRIBUTES ON TOURISTS' LENGTH OF STAY IN KEBUMEN REGENCY, CENTRAL JAVA

Fajar Aditya Nugroho, Anang Sutono, Tatang Sopian

Abstract

UNWTO states that the record of the length of stay of tourists in most tourist destinations in the world tends to be low and decreasing. In line with this issue, Kebumen Regency is recorded to have a low tourist length of average stay duration, which is 0.54 days until the end of 2019. The tourists' length of stay is closely related to the acceptance of the destination expenditure, and an increase in tourist stays can be a solution for Kebumen Regency which is noted to be the poorest district in Central Java. This research is intended to find the level of influence of destination attribute

variables on the tourists' length of stay variables. In describing the required attributes, used ten attributes of tourist destinations, namely infrastructure, superstructure, accessibility, activities/ events, local culture, physiography, destination management, service quality, hospitality, and place attachments. In this study, a descriptive method with a quantitative approach is used to obtain a detailed description of the actual conditions of the Kebumen destination attributes and their effect on the length of stay of tourists from the measured sub-variables. The result is found that destination attributes have a significant effect on the tourists' length of stay in Kebumen with a coefficient of determination (magnitude of influence) of 68.8%. The attributes considered in good condition by the respondents are infrastructure, superstructure, accessibility, physiography, destination management, service quality, and hospitality attributes. On the contrary, more intense and comprehensive development is still needed on the activities/ events, local culture, and place attachments attributes.

Keywords

Destination Attributes, Tourists' Length of Stay, Tourism Expenditure Stay
