Dear Dr. Anang

Greetings from the Editorial Board of International Journal on Recent Trends in Business and Tourism (IJRTBT) eISSN-2550-1526.

Thank you for submitting the articles entitled 'Smart Halal Destination Ecosystem Model: Measurement and Performance in Tourism Village' written by Anang Sutono, Wisnu Rahtomo, Sumaryadi, Faisal F. Puksi, Odang Permana, Shahrudin Tahir, Liu Li for International Journal on Recent Trends in Business and Tourism (IJRTBT).

Your manuscript has been considered for our forthcoming October 2022 issue.

After the initial review of the article the reviewer's comments are as follows:

1. The article has a high similarity index with 27% plagiarism report. The similarity index needs to be reduced. It should be within 20%.
2. There is a major problem with the references. Some references in the list are not present in the text and also some of the references cited in the text are not present in the reference list. The references should be arranged in the APA referencing style.

Please find attached the Similarity Index Report of your article and also the manuscript with the reviewer's comments.

We would be highly obliged if you kindly submit your revised article after making the minimal changes at the earliest possible time so that the journal office can proceed further with the publication process.

Kindly also provide the ORCID ID of the authors concerned.

In the meantime, fill-up and sign attached Copyright Waiver Form and send back to us.

For any further queries please feel free to contact with me.

With Best Regards
Ms. Roma

ABSTRACT

Purposes - This study examines the application of the Smart Halal Destination (SHD) ecosystem model in Pagerharjo tourism village, Yogyakarta. This model is used to measure the effectiveness, efficiency, and integration through technology systems to discover the performance of destination Muslim-friendly competitiveness.

Methods - This study uses a quantitative approach to assess a destination as a Muslim-friendly tourism destination. This research was conducted in three stages: Desk Research, Focus Group Discussion, Survey, and Interview.

Findings - Based on the results of the assessment of each pillar, element, and attribute, Pagerharjo tourism village has advantages in the product pillar, especially on the attribute of "ambiance" and pillar of policy, especially on the attribute "has a pre-determined superior area". Meanwhile, the attribute that still needs to be improved is the availability of slaughterhouses/poultry. Overall, Pagerharjo tourism village is considered sufficient to meet the criteria in developing a Muslim-friendly tourism village.

KEYWORDS: Smart Halal Destination, Muslim-friendly, Tourism Village
